#Experience

Project 1 – Vedly application

Vedly is a video rental application (created) with (React):

- A login form for tracking user accounts, with validation checking
- Movie sort function that can sort by name, genre, rating, and stock; all with pagination
- Search field for find a specific movie
- “New movie” component to add movies to the database.

Project 2 – Simple To-do application

Application (created) with (React):

- Basic CRUD operations
- Designed with MaterialUI
- Data caching implemented using Apollo

#Education

University / University of South Carolina

2015 - 2019 : Columbia, SC
